

COLLECTION 2022

There is nothing quite like the warmth of nature.
It's truly wonderful how we suddenly feel relaxed and calm around it. Enamored by this goodness of real wood, Mikasa Floors curated Collection 2022 that reflects true love for nature and its minutest details. From colours to patterns, it captures nature in its purest form. Making it a real treat for the connoisseurs of everything real. The Mikasa Collection 2022 is the epitome of art reflecting a sense of style that is a natural mood lifter. An evergreen beauty engineered to stand the test of time even with minimal maintenance. Come, discover wood that is sure to lift your mood.

COLLECTION 2022

FOREVER WOOD. FOREVER MEMORIES.

It has been around you forever. In the melody of the sparrow, in the sweetness of the berries, in the bliss of your swing and in the comfort of the shade. It never asked you for anything.

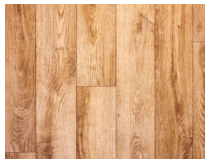

The times you needed shelter from the rains, whisper sweet nothings to the hatchlings or simply needed to embrace something familiar, it greeted you with a smile. Even when you never thanked, or acknowledged it, it was always there for you.

Those memories may have been lost to time. Wood, however, continues to endure.

The eternal nature of wood inspires Mikasa Real Wood Floors to gift those memories back to you.

Mikasa is the first & only manufacturer of Real Wood Floors in India. Using latest technology & expert craftsmanship, Mikasa brings out the true character of wood. With over 100 products, its wide-ranging collection brings together the most exotic species of wood from around the world.

PRODUCT OFFERINGS

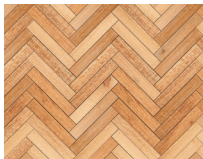

LONG PLANK

The long plank format works equally well in small and big rooms. The great diversity of colours, surfaces, and structures makes long planks parquets an ideal choice for a broad range of different spaces.

HERRINGBONE

The staggering patterns are produced using rectangular blocks joining at 90 degrees.

CHEVRON

Chevron is an inverted-V pattern design with each side meeting at a point without interruption at 45 degrees, resulting in a beautiful zigzag design.

STAIRCASE

Mikasa Staircase Solution, a masterpiece that elevates the true character of any interior space. This wooden staircase solution creates a seamless transition between floors, skirtings, and stairs by combining materials naturally to give consistency in design at different levels. Available in both formats of stairs i.e. Classic Stairs (with riser) and Contemporary Stairs (without riser). Bring home this new elevation in design and aesthetics to glamorize your space with Mikasa.

ACCESSORIES

No floor is complete without matching accessories. These cover the edges of the transit between other floors. Mikasa presents an array of accessories, underlays, skirting, and profiles to compliment your floor.

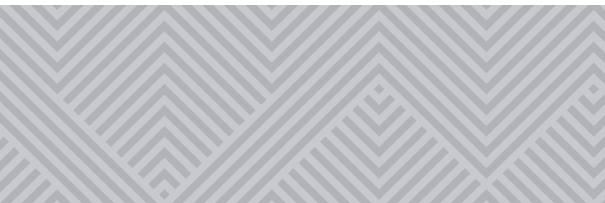

EXCELLENCE IN EVERY LAYER

Mikasa Floors consist of three layers composed of Real Hard Wood, Stabilizing Core, and Balancing Layer. Put together using the most modern technology, this construction provides solidity and stability to every plank while restricting the expansion and contraction of wood and giving your floor the resilience to stand the test of time and climate.

PlankLOC™

THE BOND THAT LASTS FOREVER

A revolutionary technology that locks two planks together without using glue, ensuring that the joints that bind the two planks never open up. PlankLOC™ allows for ease of installation, giving a seamless look to your floor that withstands the effects of seasonal change and foot traffic.

BEAUTY IN EVERY STRIP

1 STRIP

The grandeur of wide wood planks distinguishes large spaces with a smooth and well-balanced wooden look. Single strip planks give greater depth to spacious rooms and long passages.

2 STRIP

Each plank displays a 2 Strip pattern to create a distinct and individual look. Ideal for mid-sized rooms, the unique mix of patterns give the room an expansive and open appearance.

3 STRIP

The versatile and imaginative 3 Strip style accentuates any room size by fusing the vintage parquet floor impression with a modern edge and flair without any hassle.

HERRINGBONE

The staggering patterns are produced using rectangular blocks joining at 90 degrees.

CHEVRON

Chevron is an inverted-V pattern design with each side meeting at a point without interruption at 45 degrees, resulting in a beautiful zigzag design.

GRADING ON FLOORS

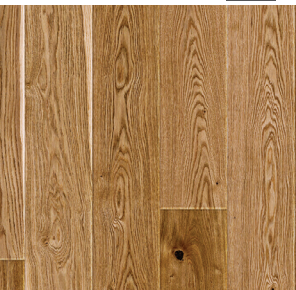

We believe in getting as close as we can get to nature and its unique character through our several different grade offerings. The true beauty of the wood depends on the part of log used to create a masterpiece. From clean natural graining and colour variations to dramatic rustic gnarls and knots, we combine nature and design in a way that nature's beauty speaks for itself.

FEATURE

FT

NATURAL

An evergreen classic that uplifts the beauty of every space with the true sense of warmth. These natural floors brings the nature in its purest form.

SMOKED

Wood, especially Oak, is processed to infuse a dark and smoky look to each plank. Using Smoking process, we play with the natural tannins in timber to enhance or invoke tones.

STAINED

UV Staining process adds elegance and a layer of sophistication to nature's real beauty. It presents Oak and Walnuts in various shades and colors.

COLORS

TEXTURES

HANDSCRAPED

While adapting to the original creation of handscraped texture, we extended its definition with planks designed to give an old-time worn look. The surface of this flooring product is first handscraped and then finished with UV and lacquer to add lustre.

SAW CUT

Saw Cut textures have a charm of their own. These dramatic, yet subtle saw marks are done with either circular saw or bandsaw. This results in an exceptional aged looking product, highlighting the beauty and aesthetic lines of the wood itself.

BRUSHED

The natural structure and texture is accentuated by mechanical brushing. Enhance the beauty of a brushed floor with other treatments such as a bevelled edge or coloured stain.

NON-BRUSHED

Finely sanded floors using special equipments in order to create a delightfully smooth finish across the board. This finish suits modern décor very well, while the wood's clean finish takes you away to a relaxing natural setting.

SATIN

Adds lustre to the wood without hiding its character. It makes the surface pleasing to the underfoot as well as being easy to maintain.

MATT

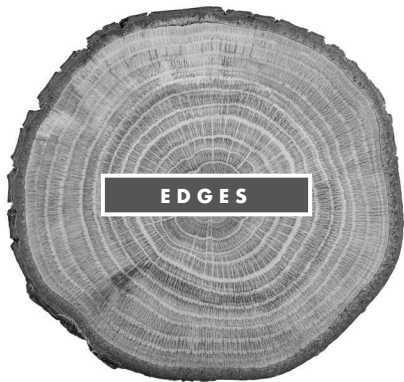

Gives an impression of pure and untreated wood. The subtle finish does not conceal wood's natural look while making it more durable and easier to clean.

SUPER MATT

The natural beauty of the wood grain is brought to the fore when the extra matt lacquer is applied on its surface. These floors gives you the lustre of oil and performance of UV lacquer.

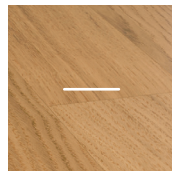

BEVELLED EDGE

Dramatically accentuates each individual plank, resulting in a more traditional floorboard feel and lends a more rustic and classical impression.

MICRO BEVELLED EDGE

Small, eased edges are virtually unnoticeable in between plank heights and offer a seamless connection between joints.

SQUARE EDGE

Creates a smooth, uniform surface that fuses the wood floors together from plank to plank and provides a contemporary and sleek look.
