## Greenlam to participate in India Design Delhi 2025 as Flooring and Sustainability Partner

By AU News Bureau — 17/02/2025 No Comments 1 Min Read

Greenlam Industries, a leading provider of integrated substrate and surface solutions, is set to participate in India Design (ID) Delhi 2025 for the fourth consecutive year. The event, organized by Ogaan Media in collaboration with Elle Décor, will take place from 20th to 23rd February 2025, at Okhla, New Delhi.

As the official flooring and sustainability partner, Greenlam Industries will showcase its premium collection, including Mikasa Floors, Mikasa Doors, Decowood Veneers, MikasaPly, Greenlam AFX, Greenlam Lexus Collection, and Greenlam MFC. Each product is designed to meet the highest standards of durability, aesthetics, and environmental responsibility.

“We are excited to return to India Design Delhi 2025 as the official flooring and sustainability partner,” said Parul Mittal, Director of Greenlam Industries. “This year’s participation holds special significance as we continue to advocate for design solutions that make a real impact. Our innovative flooring collection exemplifies our commitment to blending lasting durability, exceptional design, and eco-conscious practices.”

Greenlam Industries’ participation in India Design Delhi 2025 underscores its dedication to promoting environmentally conscious design solutions and encouraging industry transformation.

## Greenlam Industries to Showcase Innovation and Sustainability at India Design Delhi 2025

by NS — February 17, 2025 in Industry  0

New Delhi – Greenlam Industries, a leading provider of integrated substrate and surface solutions, is excited to announce its participation in India Design (ID) Delhi 2025 for the fourth consecutive year. Greenlam Industries will proudly serve as the flooring partner, as well as the sustainability partner for the event, underscoring its ongoing commitment to promoting environmentally conscious design solutions. The event will take place from 20th to 23rd February 2025, at Okhla, New Delhi.

India Design, organized by Ogaan Media in collaboration with Elle Décor, is one of India's most esteemed platforms for design innovation. Known for showcasing cutting-edge trends and creative leaders from across the globe. With over 130 exhibitors in interior décor and design, ID Delhi is the ultimate venue for discovering the latest in design and decor.

The event will witness Greenlam Industries showcasing its premium collection, which include Mikasa Floors, Mikasa Doors, Decowood Veneers, MikasaPly, Greenlam AFX, Greenlam Lexus Collection and Greenlam MFC. Each product is designed to meet the highest standards of durability, aesthetics, and environmental responsibility. Greenlam's participation as the Sustainability Partner highlights the company's ongoing efforts to champion eco-friendly practices within the design and architecture industries.

Focusing on the brands participation for the fourth consecutive year, Parul Mittal, Director of Greenlam Industries, said, "We are excited to return to India Design Delhi 2025 as the official flooring and sustainability partner. This year's participation holds special significance as we continue to advocate for design solutions that make a real impact. Our innovative flooring collection exemplifies our commitment to blending lasting durability, exceptional design, and eco-conscious practices. At India Design Delhi 2025, we look forward to engaging with the vibrant community of architects, designers, and industry leaders, while showcasing how Greenlam's solutions can help create more beautiful, environment-friendly spaces."

Greenlam Industries continues to be at the forefront of design innovation, constantly pushing the envelope to provide goods that are ecologically conscious and forward-thinking. The brand aims to encourage industry transformation and help create a more environmentally conscious future by fusing cutting-edge technology with sustainable practices. Greenlam's ongoing participation at India Design Delhi demonstrates its dedication to providing solutions that improve environments, while interacting with stakeholders and design experts.
