Declaration of Recyclable Content - Engineered Wood Floors

This is to certify that Mikasa Real Wood Floors – 15mm Pristine, 13mm Arbor & 10mm Atmos. created using patented three-layer parquet technology. Designed for use in residential and commercial applications,. The Floors are durable, easy to install with a glueless system and easy to maintain. Mikasa Floors uses a leading edge environmentally preferred sustainable construction holding multiple voc emission certifications globally and contributes to certified green construction standards. We are committed to using a high-percentage of recycled materials in all products manufactured and sold. Owing to this construction and raw material the products are declared as **100% recyclable** post use.
