# PLAY WITH COLOUR

COOL COMBINATIONS, ACCENTS & IDEAS FOR A VIBRANT HOME

**1. SUMMER TIME** is all about living light. Pastel-coloured laminates work wonders to create a pleasing ambience for your room. They're gentle on the eyes and make your room brighter. A pastel feature wall can become

a canvas for you to hang your frames and other vertical paraphernalia. Apart from a feature wall, you can also use pastel shades for other vertical applications, such as cabinets and inside old bookshelves. Complement the room

with pristine white doors. *Parul Mittal, director, Greenlam Industries Ltd*

**2. TO INSTANTLY** change the look of your home, choose wooden flooring in bold shades to create

a contrast. Try the current global trend, a herringbone pattern, to add an interesting angle. *Parul Mittal*

**3. ANIMAL PRINTS** on the furniture can add an interesting detail in your

space. Think a statement settee for a bedroom or a bar unit that has the print on its door, or an accent chair. Faux fur is also trending internationally and perks up the décor instantly. *Neha Sinha, founder, Rainforest Italy*
